EDUCATION

Carnegie Mellon University – Heinz College of Information Systems and Public Policy

Master of Science in Information Security Policy and Management (MSISPM)

Expected: May 2027

George Washington University – Washington, DC

Bachelor of Science in Cybersecurity

GPA: 3.95 | June 2025

Boeing Scholarship Recipient

Women in Cybersecurity (WiCyS) Training Scholarship

COURSEWORK & SKILLS

Relevant Coursework: Software Security, Network Security, Cyber Risk Management, Cryptography, Cyber Intelligence, Incident Response, Intrusion Detection Management, IT Security Audits, Compliance & Risk Assessment, Vulnerability Management

Security Operations & Risk: Incident Response, MITRE ATT&CK, Vulnerability Assessment, IT Audit Support

Technical Tools: Wireshark, Nessus, Splunk, Metasploit, AWS, Linux, Python, SQL

CERTIFICATIONS

- MITRE ATT&CK® MAD 20 (September 2025)
- AWS Certified Cloud Practitioner (November 2024)
- (ISC)² Certified in Cybersecurity (CC) (November 2024)

PROJECTS & RESEARCH

Password Breach Aggregator and Policy Analyzer

- Built a Python-based system aggregating 10,000+ breached credential records to analyze credential exposure patterns and systemic password risk
- Reduced manual credential review time by approximately 40% through automated parsing and risk categorization logic
- Translated technical findings into structured password policy and governance recommendations

Cybersecurity Resilience and Incident Response Blueprint – Project Lead

- Designed an enterprise incident response program aligned with NIST 800-61, including 6+ playbooks and defined escalation paths
- Developed role-based response matrices clarifying responsibilities across technical and executive stakeholders

SPEAKING & ENGAGEMENTS

Cybersecurity, Stronger Together Conference – George Washington University

Invited Speaker

- Delivered a talk on cyber resilience, cross-sector collaboration, and the evolving relationship between academia, government, and industry
- Audience included university leadership, faculty, government stakeholders, and industry partners

PROFESSIONAL EXPERIENCE

Cyber Security Forum Initiative (CSFI) – Washington, DC-Baltimore Area

Senior Fellow (Volunteering)

January 2025- Present

- Serve as liaison supporting planning efforts for a multinational cyber readiness exercise involving defense and interagency stakeholders
- Support development of cyber exercise scenarios by synthesizing threat intelligence insights and aligning objectives with national security priorities
- Conduct open-source cyber threat research and apply the MITRE ATT&CK framework to map adversary tactics and techniques for scenario modeling

Languages: English, French, Arabic, Spanish
